

Product: 75% Alcohol Hand Sanitizer
Features: Fragrance-free; Water-free; Antibacterial clean hand protection
Main Ingredients: 75% Alcohol
Suitable: Universal

Packing Available:

29 ML, 60ML, 100ML, 296ML ,500ML,1 LITRE Bottles

Also available in 1.18L/ Barrel, 1.5L /Barrel, 5L/ Barrel, 20L/ Barrel,

Certification: CE, FDA

75%Alcohol Disinfectant Spray

Product: 75% Alcohol Disinfectant Spray

Features: For hands; Complete skin; Car interiors

Main Ingredients: 75% Alcohol

Scientific certification shows that neither pure alcohol nor water is sufficient to denature the protein in bacteria. Only when alcohol and water coexist will the protein lose its physiological activity. 95% alcohol concentration is too high, too high alcohol concentration will form a protective film on the surface of bacteria to prevent it from entering the bacteria, it is difficult to completely kill the bacteria. If the alcohol concentration is too low, although it can enter the bacteria, the protein in the body cannot solidify and the bacteria cannot be completely killed. 75% medical alcohol can quickly penetrate into the bacteria, and then solidify the protein in the whole bacteria to achieve the purpose of sterilization. Spray the surface to be disinfected to effectively sterilize.

75% alcohol disinfectant spray is a disinfectant with ethanol as the main active ingredient, the ethanol content is $75 \pm 5\%$ (v / v). It can effectively kill Staphylococcus aureus, Escherichia coli, Candida albicans and common bacteria in hospital infection

75% alcohol disinfectant spray specifications are complete, used in a variety of scenarios.

60ml	2 fl.oz	CE certificated
100ml	3.4 fl.oz	CE certificated
175ml	5.9 fl.oz	FDA & CE
