

LUGGAGE DISINFECTION SYSTEM WITH ASPIRATOR TE-DZN-02

- The TE Design team has diligently worked to find solutions for the fight against the Covid 19 Pandemic.
- Baggage transfer points have a high potential for virus transmission during travel. Luggage (luggage, suitcases, bags) is one of the points where contamination occurs.
- TE Design luggage disinfection systems positioned at the baggage transfer points can prevent the possible virus transmission to baggage handling personnel and customers. The TE Design team has aimed to prevent the harmful effects of disinfectant for personnel and users in enclosed areas with intensive with a aspirator system.
- Disinfection of luggage is important in preventing the spread of viruses.

- Fully automatic, contactless disinfection.
- Non-contact disinfection with sensor dosing system.
- AISI 304 quality stainless steel body, chassis and installation.
- Excellent pulverization.
- 38 lt Disinfectant tank.
- Minimum consumption, maximum efficiency.
- Modular design, easy installation.
- Conformity certificate and test report according to CE 2006/42 / AT Machinery Safety Regulation.
